

## SPOTLIGHT **HEALTHCARE**

to become a turning point in the digital health market. Due to our busy lifestyle and digitally-led life we can expect a huge growth in the Telehealth sector. E-clinic and Telemedicine are poised to see an exponential growth. Ayush Mishra, Co-Founder, Tattvan, an E-Clinic says, "With the advent of digital technology, new realms are now opened in the healthcare sector. Technology has made it comfortable for patients to get the treatment at home. They don't necessarily have to go to the hospital or visit a doctor to get the treatment. In the case of emergencies, it enables the patient to get quick access to treatment as it also resolves the issues of time and

distance."

### **ON-DEMAND HOME AND CONVENIENT HEALTHCARE**

2019 will see a shift from traditional

modes of using healthcare services to on-demand convenient healthcare services. Right from medicine delivery to home diagnostics to post-operative care the demand for convenient, at-home services will grow. Hari Thalapalli, Chief Executive Officer, CallHealth adds, "Traditional stand-alone systems are being replaced with single-point service integration. All healthcare services such as doctor consultation, nursing, physiotherapy, etc. can be accessed from different service providers. Data from Healthcare Devices and Service Providers will converge into the unified eHR in real-time, helping specialists establish a cause-effect relationship with greater accuracy."

## **FROM ORTHOPAEDIC AUTHORITY TO MULTISPECIALTY EXPERTISE**

**F**ounded in 2006 by **Dr Sharan Shivraj Patil (in photo)**, a renowned orthopedic surgeon, with a vision of bringing world class healthcare to the masses, **Sparsh Hospitals** has created a niche in the field of healthcare within the country and on a global platform. Sparsh from being a core joint replacement centre to a multi-specialty hospital for over a decade has transformed healthcare delivery touching many lives. Synonymously known for breakthrough orthopedic care we have established ourselves into a spectrum of multi-specialties in the field of medicine. Expertise, excellence, commitment, dedication and passion have made us pioneers in the field of Orthopaedic Care, Organ Transplantation, Gastroenterology & HPB Surgeries,

Plastic Reconstructive Surgeries, Neurosurgery and Oncology.

Our transplant surgeons have extensive experience in liver, pancreas, kidney and heart transplantation procedures. The plastic and the reconstructive surgeries performed by our plastic surgeons are top-notch with exceptional results. Advanced oncology care in breast, hematology, medical and surgical cancer specialties at Sparsh has given many a second chance in life. At Sparsh we constantly attempt to bridge the gap between medical excellence and social significance. This thought has inspired us to conduct Guru Namana and Sparsh Vachana every year, where surgeries are conducted for teachers and

students coming from humble backgrounds free of cost. Our constant endeavour is to give our patients outstanding expert comprehensive care. We are committed to best practices and have all specialties under one roof. Infrastructure and technologies used at Sparsh are second to none and we have advanced treatment options to offer to our patients. Sparsh lives by the ethos of Faith, Hope and Love.
